Re: National Security Clause - Plancor 327 Facilities -  
Fairmont City and Monsanto, Illinois

Dear Mr. Ferguson:

Reference is made to our telephone conversations in connection with the removal and elimination of certain obsolete items from the Security Clause with respect to the above-captioned Plancor.

The undersigned has been authorized to request, on behalf of the American Zinc Company of Illinois, a substitution of newly installed facilities for obsolete Plancor 327 Facilities under the National Security Clause contained in the instrument of conveyance under which the American Zinc Company acquired title as of January 1, 1950 to the facilities at Fairmont City and Monsanto, Illinois.

There is herewith attached an original and copy of an instrument listing the obsolete facilities to be removed from the National Security Clause by reason of the substitution, and a description of the substituted facilities to become subject to the Clause.

I have been authorized by the President of the Company to inform you that the newly installed facilities described on the attached statement permit the production of a larger quantity and a better grade of product than the obsolete facilities were capable of producing. The new facilities also permit production with the use of less manpower which is beneficial to national security in times of emergency.

If there is anything further, please do not hesitate to call me.

With kind personal regards.

Sincerely yours,

*Albert H. Greene*
